PROFESSIONAL SUMMARY

Software Development Engineer with 4+ years of experience building distributed systems, data-intensive applications, and cloud automation using Python, TypeScript, and AWS. Project experience in anomaly detection, prompt engineering, and LLM-assisted debugging, supported by production work improving reliability and reducing latency by 20%. Experienced in architecture reviews, telemetry-driven investigation, and AI-assisted implementation using GitHub Copilot and Claude.

PROFESSIONAL EXPERIENCE

Software Development Engineer | ViaSat Inc | Remote (HQ: Carlsbad, CA)

Jan 2023 – Present

- Engineered a real-time anomaly detection and remediation pipeline processing 200+ weekly network events using Splunk APIs and GitHub Actions CI/CD, reducing incident response time by 50%, used GitHub Copilot to accelerate development.
- Built distributed Python automation across multi-region AWS infrastructure, reducing incident resolution time by 40% and eliminating 10+ engineer-hours of weekly manual work.
- Used telemetry, analytics, and SLA metrics to diagnose complex production issues, improving network stability by 15% and reducing latency by 20%, incorporated findings into postmortems and architecture reviews.
- Evaluated system architecture trade-offs with engineers and stakeholders and reviewed code for accuracy, testability, and efficiency while advocating AI-assisted development practices.

Technical Lead | Doodleblue Innovations | Chennai, India

Aug 2020 – May 2021

- Architected offline storage and crash-analysis capabilities across 5+ client applications, reducing downtime by 40% and data loss incidents by 30%.
- Led technical delivery through secure AWS configuration practices, documentation, and pre-production testing, achieving 80% adoption and supporting 2x repeat client intake.

Software Development Engineer | Doodleblue Innovations | Chennai, India

Aug 2019 – Aug 2020

- Built a data-intensive monitoring application using TypeScript, Next.js, and Prisma ORM, integrating real-time satellite beam and weather data visualization to improve issue resolution efficiency by 25%.
- Re-architected and maintained a scalable platform across 15+ web integrations, improving user satisfaction by 40% and enabling 2x faster root-cause correlation.

KEY PROJECTS

AI Assisted Network Anomaly Detection | Python, Splunk APIs, GitHub Actions, CI/CD, Prompt Engineering

- Developed distributed anomaly detection processing 200+ weekly network events using Python, prompt engineering, and LLM-assisted debugging, automated remediation through CI/CD workflows to reduce manual intervention by 20%.

Automated Audit & Notification System | Python, JIRA APIs, Database Publications

- Built a Python service integrating Jira APIs and database publications, reducing manual workload by 60%, improving ticket compliance by 70%, and reducing rule violations by 35% after deployment.

Advanced DevOps Monitoring Application | TypeScript, Next.js, Distributed Systems

- Built a TypeScript and Next.js platform providing real-time data visualization and observability across distributed infrastructure, enabling 2x faster issue correlation.

EDUCATION

M.S., Computer Science and Systems | University of Washington, Tacoma, WA

Dec 2022

B.S., Computer Science | Anna University, College of Engineering, Guindy, India

May 2019

TECHNICAL SKILLS

- Programming Languages:** Python, Java, TypeScript, JavaScript, SQL, Kotlin, C++ through coursework and personal projects.
- AI & Development:** Prompt engineering, LLM-assisted coding and debugging, GitHub Copilot, Claude, anomaly detection.
- Distributed Systems:** AWS, GCP familiarity, distributed computing, caching strategies, data locality, cloud storage.
- Observability & Performance:** Telemetry analysis, Splunk APIs, production debugging, root-cause analysis, incident management.
- Software Delivery:** GitHub Actions, CI/CD, unit testing, code review, pre-production testing, Git, Agile/Scrum.
- Applications & Data:** Next.js, Prisma ORM, Tailwind CSS, API integrations, real-time data visualization.
